

selkirk flood protection scheme

What happens now?

Thank you for taking the time to review our exhibition. Please remember to fill in a questionnaire, it should only take a minute.

After the public exhibition has concluded, we will be carrying out the following activities to arrive at a preferred scheme for Selkirk.

- Taking on board your comments to help in the option selection process
- Carrying out more consultation with affected landowners and public bodies
- Considering the environmental, social, technical and economic factors which will influence our preferred scheme

Once we have decided on the preferred scheme we will carry out some preliminary design work before holding another public exhibition around Spring 2011. This will allow us to take on board your comments again before submitting the scheme for approval.
