

selkirk flood protection scheme

What happens next?

Thank you for taking the time to review our exhibition. Please remember to fill in a questionnaire, it should only take a minute.

After the public exhibition has concluded, we will be carrying out the following activities to deliver an approved Scheme for Selkirk.

- Taking on board your comments to help in the final outline design process
- Carrying out more consultation with affected landowners and public bodies
- Preparing the documents and drawings for the formal Scheme submission to Scottish Borders Council

All those directly affected by the proposals will be served notice of the intention to take the Scheme forward in the autumn. There will be a one month period for formal comments on the Scheme to be made. If, after this time, there are no objections to the Scheme, then the proposals can be officially confirmed. The detailed design of the various elements of the Scheme can then proceed.
